

HEY THERE!

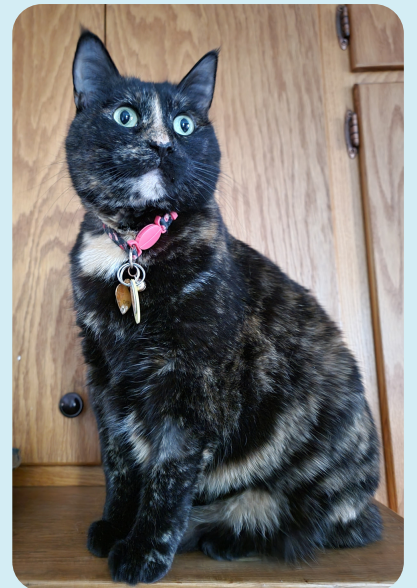

We just want to let you know that we're very excited for the opportunity to introduce ourselves and give you a snapshot of our family. We understand it's a difficult decision, and you have our deepest respect, empathy, and support.

SAM & ANDREA

ABOUT US

We met in school in the 3rd grade! While we weren't friends at the time, we found chemistry, where else, but in chemistry class in high school! We're high school sweethearts and have been together ever since then. The two of us have chosen adoption because we found that we are infertile. We always planned to adopt, and we are ecstatic!

Originally from the California Bay Area, we found our forever home in Minnesota. We have family in the Twin Cities suburbs and in California. Our favorite activities include: exploring Minnesota's state parks and little towns, trying new restaurants, visiting California, watching movies, and going to estate sales.

WINNIE BISCUIT
Sweet and affectionate

ABOUT SAM

He's described as a big teddy bear because he's so warm to everyone. Sam is someone you can count on to get something done. Kind, relaxed, extroverted, and patient are a few ways to describe him. He loves to play his many guitars, collect old video games, and read sci-fi books when he's not at work in the cellular industry.

ABOUT ANDREA

She is sweet and kind with everyone she meets. Andrea is artistic and able to create anything from doll houses to sewing her own wardrobe. There's no one more loyal and caring than her. Andrea loves to tend her garden, sew, do various crafts, and do DIY projects around the house. She loves her job in medical insurance.

FAMILY

Our extended families live in both Minnesota and California. Both of us have nieces and nephews that are young, and we visit each other often for family gatherings! When we get together, we travel to new destinations, eat great food, and have fun bonfire parties together.

OUR HOME

Our home is located in a quiet part of the Twin Cities. There's a park with a playground, a huge field, and a library all across the street from us! In the back yard, we grow fresh veggies and mammoth sunflowers, and there's plenty of room to play and relax.
