

Hello! We're Kate & Collin!

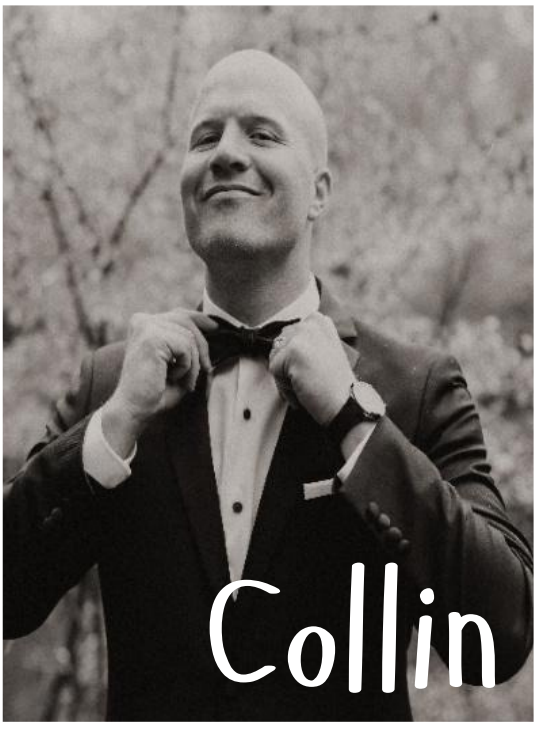

We met in college. Since then, we've married, added two dogs to our family, and started remodeling our forever home (on a golf course located near Lake Minnetonka). Together, we have a biological daughter. She needed a heart transplant and sadly died from complications of the heart she was gifted. Our daughter, her donor, and their family taught us that family is built by love, not blood; the importance of honoring those who shape us; and that, as a family, we can do big, brave things. Our journey together has not been easy, but it has taught us how precious life is and how to cherish each moment. It is therefore with heartfelt excitement and profound hope that we're pursuing adoption, because the gift of parenting is one we will never take for granted.
